

ParcelPoint

E-Commerce Solution for Seamless Deliveries

Secure, SMS-powered parcel management that transforms package delivery for high-traffic properties. Simple, Convenient, and seamless.

Bank-level locker security with SMS simplicity. Secure storage meets instant access codes, seamlessly integrated into your property's ecosystem.

FAQ'S

Q: How does the SMS access system work?

A: When your package is stored, you receive a unique access code via SMS. Simply enter this code at the locker to retrieve your parcel.

Q: What happens if I don't pick up my package immediately?

A: Your parcel remains securely stored in the locker until you're ready to collect it, giving you the flexibility to pick up at your convenience.

Q: What if I don't receive the SMS code?

A: The system can resend your access code upon verification of your identity through the property management office.

Q: What if the lockers are full?

A: Our system is designed to optimize space usage, but in rare cases, packages will be securely held at the property office.
